2019 Year of the 3 ($2+0+1+9=3$) & Year 3 in Our Current Nine Year Cycle

The year of creation, manifestation & self expression

A year that allows you to use the lessons of the past to create a new present reality and future of your dreams. Bringing the beginning, middle & end, the 3 sided triangle when pointed up & the womb when pointed down, the trilogy of mother, father & child (Mother Earth, Father Sky & humans) coming together.

This is a year of personal happiness and fulfillment.

April

April is a month of karmic revelation & truth being revealed. On a personal side, the more true to yourself you have been living, the month shall be easy & relaxed. There shall be drama in the global world around corruption as the truth is revealed. This may very well cause an economic disruption in the United States.

It is a month of extreme self care - step back, relax & surrender. Let the Universe do its magic of creation in between your steps of manifestation. Take time to meditate, take walks & enjoy the wildflowers, & just be because May is another month of intense creation.

1. Take time to yourself this month
2. Nourish your soul (be creative, dance, write, plan something new, etc.) and dissolve/eliminate what is not true to you
3. Connect with your guides and angels

Aries new moon April 5
Libra blue moon April 19
Numerology Power Day 4/4
